

Intermediate Full Stack Developer – Pretoria *Hybrid

Description

Job Title: Intermediate Software Developer / Full Stack Developer

Location: Pretoria, South Africa

About Us: A technology consultancy dedicated to crafting bespoke software solutions for organizations in the finance, banking, insurance, and fintech sectors. They excel in handling diverse projects for prominent financial entities, fintech startups, and large-scale corporations.

What They Do:

- Develop software for web, mobile, and IoT platforms.
- Create analytical tools.
- Employ data science, user-centric design, and development strategies to produce cutting-edge products.
- Work closely with clients to address challenges and improve user experiences.

What They Offer:

- Mobile development
- Web development
- Cloud development
- Artificial intelligence
- Experience design
- Game development

Position Summary: They are searching for proficient Full Stack Developers with 4-5 years of experience to join their team. The developers will engage with various technologies, handling both front-end and back-end development.

Responsibilities

Key Responsibilities:

- Design and maintain web, mobile, and IoT applications.
- Construct robust and scalable software using C#, Java Backend, JavaScript (Vue.js, Angular.js, React), SQL Server, and AWS/Azure cloud services.
- Collaborate with clients and stakeholders to gather requirements and provide technical expertise.
- Participate in code reviews, testing, and deployment processes.

Qualifications

Qualifications:

- BSc Degree or BTech Degree (non-negotiable).
- 4-5 years of experience in full stack development.
- Proficiency in C#, Java Backend, JavaScript (Vue.js, Angular.js, React),
